

## Secure Coding Practices

### OWASP Top 10 (2021): What's Changed and Implications to Application Developer

Free Webinar

24 November 2021,  
15:00-16:30

Zoom Webinar

Cantonese with English  
terminology

Those who interest in  
web application security

The latest OWASP Top 10 2021 version features considerable changes by shifting to emphasise security control areas over individual vulnerabilities for improved risk management. It leads to a recategorisation of several risks and new additions. Examples are the most significant one is now the Broken Access Control, while the long-standing number one risk of "Injection" is downgraded to 3<sup>rd</sup> position.

Wanna know more about the changes? Join this webinar NOW and learn from software security specialist from OWASP HK Chapter and security expert!

The rationale of changes

What should I pay the  
most attention to

Secure coding pattern

## What is OWASP Top 10?

Open Web Application Security Project (OWASP) is a non-profit foundation dedicated to web application security. It has recently published the latest Top 10 web application security (AppSec) risks (OWASP Top 10). The OWASP Top 10 list presents the most impactful risks of AppSec in a categorised and prioritised format for organisations to focus on prevention and mitigation. The 2021 edition of OWASP Top 10 is compiled by two methods: eight out of the ten categories come from statistical data of over 500,000 applications, while the other two are selected from a survey of front line practitioners on the highest risks. It has also been enhanced with the analysis of close to 400 Common Weakness Enumerations (CWEs). This makes OWASP Top 10 one of the most comprehensive standards for web AppSec.

## Rundown

Date	Topic	Speaker
15:00 – 15:30	OWASP Top 10 (2021) - Call for Attention	Mr Boris SO OWASP HK Chapter Lead
15:30 – 16:00	Attacking OWASP Juice Shop	Mr Bernard KAN Security Expert
16:00 – 16:30	Panel Discussion: Adopting secure coding in development team: the difficulties and challenges	Moderator: • Mr Otto LEE (HKCERT) Panelists: • Mr Boris SO • Mr Bernard KAN • Mr Yu On NG (HKCERT)

## Enrolment method

1. Scan the QR code or enter the below URL  
<https://form.jotform.com/hkcert/owasp-top-10-webinar>
2. Complete and submit the online enrolment form
3. The Zoom link will be sent 1 week prior to the webinar
