SMEs, Education and
General Public

Continuous innovation in Internet technology development and applications has enhanced quality of life and work efficiency but has also created various new cyber security challenges. It only serves to fuel the demand for cyber security professionals. To address the challenges, the training of local cyber security talents is indispensable.

In light of this, the Hong Kong Computer Emergency Response Team Coordination Centre (HKCERT) and the Hong Kong Productivity Council (HKPC) jointly hosted the “Hong Kong Cyber Security New Generation Capture the Flag Challenge 2022” (CTF) in November 2022 to strengthen the cyber security skills and awareness of the industry and students and encourage problem solving through teamwork, creative thinking and cyber security skills.

The award presentation ceremony will be held on 19 December, 2022. Apart from presenting the awards to the winners, cyber security experts will also be on hand to share their views on cyber security, and how to leverage vulnerability management solutions to improve security and security risk management. Besides, there will be a panel discussion on how the new generation can join the trade.

Objectives

By joining this webinar & award presentation ceremony, participants can:

- Understand how cyber security experts deal with risks and system vulnerability management
- Learn how to leverage vulnerability management solutions and deal with ransomware attack
- Get the recommendations for young people who like to join the cyber security industry
- Learn more about the CTF competition and congratulate the winners!
